PRODUCT DEVELOPMENTS

Insight on refinements in material and technology advances, especially as they relate to the AIA's core and emerging priorities: design+health, material transparency, resilience and energy efficiency.

FROM THE FLOOR OF A'17

Shildan is expanding beyond walls to decking with the first such application using additive- and artificial color-free ceramic as the material.

Hex cement tiles mix well with wood, as shown in a 200-year-old factory pictured left.

HIGH-TRAFFIC HIVE

Granada Tile has introduced the Hex Collection. Extensive patterns with unlimited color combinations allow designers to create unique custom flooring installations. Shown here in solids, hexagons creep up the wall as the Hex collection is ideal for adding a pop of visual flair, a dash of color or for developing intuitive way-finding. **Circle 411**
